# HEY'DI AQUASIL WATERPROOFER

Colourless proofing

## Description

Hey'di Aquasil is a colourless, water-repellent silicon impregnation for outdoor use which provides permanent water proofing and protects the surface against moisture, dirt and crumbling. The treatment does not affect the vapour permeability of the substrate.

Warning: Do not use on floors or slate.

## Facades

Building faces - walls - chimneys - of brick, plaster and concrete.

## Preparation

The surface to be treated must be clean and dry. Dirty surfaces are cleaned using Hey'di Rens OF (oil-grease) or Hey'di Rens KS (calcium-salt).

## Application

Hey'di Aquasil is applied by brush, soft-haired brush (preferably uncoloured natural hair) or low-pressure spray gun. Two coats are recommended for coarse or strongly absorbent surfaces - wait 2-3 hours before applying the next coat. Do not apply in rain or strong sunlight. Stains on doors, windows etc. should be removed using white spirit.

## Consumption

Depending on the absorption rate of the surface, 0,2-0,4 litre per sq.m.

## Storage

May be stored for several years.

## Packaging

1 litre can and 5 litre bucket.

## TECHNICAL DATA

Comments: ..... Can not be painted over

Consumption of material: .....

## PRODUCT INFORMATION

### Hey'di item number:

1 litre: ..... 411

5 litre: ..... 412

### GTIN nr:

1 litre: ..... 7054150000321

5 litre: ..... 7054150000338

### Work Hygiene/Precautions

The product is considered "Danger".

Read the warning on the package.
