

## Vurderte/godkjente materialer for bruk i kontakt med drikkevann

## Evaluated/approved materials for use in contact with drinking water

For materialer (byggevarer, malingsbelegg, rørmaterialer m.m.) i kontakt med drikkevann på land eller offshore foreligger det ikke krav om en formell godkjenning, utover de generelle kravene i drikkevannsforskriften. Nasjonalt folkehelseinstitutt foretok tidligere helsemessige vurderinger av slike materialer på forespørsel, men dette gjøres ikke lenger. Denne listen inneholder materialer som tidligere enten var vurderte med tanke på en mulig helsemessig risiko ved bruk i kontakt med drikkevann på land, og/eller var godkjente for bruk i kontakt med drikkevann offshore, av Nasjonalt folkehelseinstitutt. **Vi gjør oppmerksom på at enkelte materialer på denne listen kan være gått ut av produksjon. For nærmere opplysninger om enkeltmaterialer, inkludert fullstendige vilkår for vår vurdering/godkjenning og bruksområder, vennligst kontakt produsent/importør. Listen vil ikke lenger bli oppdatert.**

For drinking water contact materials (construction products, coatings, pipes etc.) used onshore or offshore no formal approval is required. However, the Norwegian Institute of Public Health previously performed toxicological evaluations of such materials on request. The present list contains materials that were previously either evaluated for potential health risks by use onshore, and/or were approved for such use offshore, by the Norwegian Institute of Public Health. **Please note that some of the materials on this list may no longer be in production. For full information about a certain material, included all premises which were the basis for our evaluation/approval and acceptable areas of use, please contact the manufacturer/importer. This list will no longer be updated.**
